

GS1 Australia Product Imaging Service

Bar code testing, product measurement
and imaging in the one place

GS1 Product Imaging Service is available to both members and non-members of GS1 Australia. Images can be either high or low resolution in a cropped jpeg format and are suitable for both shelf-space management and on-line product presentation purposes.

Complete retail product samples submitted to GS1 Australia Bar Code Testing Service can be imaged and we can provide you with the convenience of having your products tested for bar code quality, accurately measured, digitally imaged and automatically loaded onto GS1 net in one easy step or alternatively you can forward your products for imaging only.

GS1 digital images are preferred by a number of leading Australian retailers for shelf space management and compliment the details of retail products currently available from GS1 net.

Images are supplied via email or CD and can also be accessed from GS1 net.

For more information, pricing and specifications please visit;
http://www.gs1au.org/services/digital_imaging/digital_imaging.asp

NOTE:

- Maximum of four orientations for low-res imaging.
- Provision for size and colour variants is not included.
- High-Resolution images that are too large for emailing will be saved onto a CD.
