

Data Accuracy for FMCG Brokers with GS1net | FACT SHEET

GS1net offers secure, effective and efficient product data synchronisation to Australian and New Zealand business. GS1net allows validation, safe storage and maintenance of product, pricing and other trade information in a single location. This global standards-based information can then be shared with trading partners across all industry sectors, nationally and worldwide.

GS1 Australia in recognising the importance of brokers in the FMCG industry is offering a package that brings together the data synchronisation needs of brokers, their clients and retailers. The GS1 Australia Broker Offer will assist in the secure and accurate alignment of data between trading partners quickly and efficiently. Additional benefits include: access to free online training, Help Desk support and access to GS1net tools.

FEE STRUCTURE

Companies that wish to be represented via a broker will need to meet the fees, terms and conditions as outlined in the Fees section of www.gs1au.org/services/g1net/
