
Office Supplies Extension Attributes

Part of the process of determining which fields you will need to gather in order to successfully publish your catalogue to GS1net, and ultimately to your trading partners is to give consideration to the type of product you are including in your range.

The requirement to complete the Office Supplies Extension Attributes is highly dependent on your product type. The single question you need ask yourself when trying to determine the need to populate extension attribute information is:

Is my product(s) packaged or required to be shipped in more than a single container? Examples of such products might be:

- Furniture
- Computer equipment
- Large consumer electronic equipment

If you determine that your product range falls into this type of category, you will most likely be required to complete all the office extension attributes that are highlighted in PINK in the data model.

If you are unsure, please do not hesitate to contact your GS1 Service Support Advisor for clarification.
