### **National Location Registry**

This is a central database that allows "Location Owners" to load validated location information online. And then shared with authorised users. Location information for each location record can include:

- Trading or operating hours for peak periods
- · Safety constraints at a site
- · Driver amenities
- Weight/height restrictions

Learn how the National Location Registry works.

### Scan4Transport can make your freight talk!

Need to implement a logistics label for your deliveries? Ask your label software provider if they have Scan4Transport enabled.

By using a standard logistics label with Scan4Transport included, you will see improved efficiency and interoperability across the entire supply chain.

Find providers

### Food Agility uses GS1 standards

Food Agility used GS1 standards to create a digital map of properties and the movement of products in the NSW cherry and potato supply chains. Trials demonstrate the system can be used to recall products within 60 seconds.
